

Environment Policy

At Asahi Beverages, we acknowledge the strong link between our raw materials and the environment from which they are sourced. Turning natural resources into high quality beverages for the enjoyment of our consumers is what we do. In doing this, we are committed to minimising the impact we have on the environment in which we live.

Commitments

Recognising the importance of our environmental responsibilities, we commit to:

1. Compliance

Comply with all environmental legislation and other relevant obligations

2. Accountability

Provide people at work with the information, training and supervision to understand and uphold their environmental responsibilities

3. Management of systems

Implement and operate an effective environmental management system

4. Environmental impact reduction

Identify all points where we impact the environment and take action to eliminate, minimise or mitigate their impacts. This will include but not be limited to:

- Reducing greenhouse gas emissions through improved energy efficiency and sourcing
- Improving the efficiency with which we use water, packaging and other materials
- Moving towards zero waste to landfill by reducing, reusing and recycling wherever practicable.
- Protecting ecosystems and biodiversity through the prevention of pollution
- Integrating environmental considerations into strategy, product and packaging design and procurement
- Working with business partners, industry bodies, government agencies, community groups and other concerned organisations to promote environmentally sustainable practices.

5. Continual improvement

Establish, measure and review objectives and targets to continually reduce our impact on the environment.

Robert Iervasi
Chief Executive Officer
